Portfolio gallery (thumbnails & captions)				x	
Portfolio reflections/description pages				x	
Contact page			x		
<b>Reflections</b> (description of portfolio pieces)					
Content of reflections appropriate					x
Project images are high quality				x	
Spelling and grammar are correct				x	

What was your overall first impression of the website?

The website is overall good. There are some designs that need improvement, but the foundation of the web page is strong.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

In the contact me page, I did not see a thank you page right after notifying me that the message was sent.

What do you feel are the most effective design elements of this web portfolio?

Most effective were the about me page and the projects page. They explain well and give a strong portfolio.

What would you suggest be changed with the design or content of this web portfolio?

The about me page, specifically making the images full size as if it was 50% wording versus 50% image across the screen. Rename "Project 1, Project 2, etc.." to the name of the projects completed. Check spelling, Insert image of your prototype, explain which UI/UX elements you implemented and why.

Project images are high quality				x	
Spelling and grammar are correct			x		

What was your overall first impression of the website?

The website is very good to start off with. There is some room for improvement, but most of the work is pretty well detailed.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

The contact page was a bit misleading, as it did not have a thank you note after the message was sent to Gio. I also noticed that the timeline in the about me page needs some adjustments.

What do you feel are the most effective design elements of this web portfolio?

The most effective design elements were the color scheme, the layout of the pages, and the project descriptions.

What would you suggest being changed with the design or content of this web portfolio?

The contact page having a thank you note, the timeline in the about me page being fixed, images being adjusted better and having hopefully better quality. Reduce the size of the portrait picture to show a bit of text at the home page for the portfolio.

What was your overall first impression of the website?

I thought it was really well designed and it was very well put together. There are some designs that can be improved overall,

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

No, everything was well designed. I like how the projects section was organized and told you which project you were on, without being seen on the navigation section

What do you feel are the most effective design elements of this web portfolio?

The most effective design elements are the boxes with texts, the layout structure of the projects, giving a lot of detail about each project, and the color contrast.

What would you suggest be changed with the design or content of this web portfolio?

One thing I would change personally is the way the timeline is structured in the about me web page. You can see the line is too long and needs to be sized the right way.

What was your overall first impression of the website?

This website is well designed and gives good strong portfolio designs and relative work done in the UI/UX field.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

When filling out the contact page, it took me back to the home page without any notification if my message was sent or not.

What do you feel are the most effective design elements of this web portfolio?

The most effective are the color schemes, which were chosen very well. The about me page was designed very good, and I liked the timeline a lot at the bottom of the website page.

What would you suggest being changed with the design or content of this web portfolio?

The timeline should be slightly adjusted to look better, the vertical line is going longer than it should. The contact page should have a thank you note after filling it out.
